WELCOME

It is with immense joy and anticipation that we extend our warmest welcome to you for the much-anticipated joint South Central and Southern Chapters of the Medical Library Association 2023 Meeting!

At the heart of our event lies the spirit of collaboration and shared learning. The theme of Kindred Spirits resonates deeply as we come together to exchange ideas, experiences, and insights.

It's a time to nurture existing connections and forge new friendships that will undoubtedly enrich your professional journey. I hope you're participating in our Kindred Spirits Contest as the winners will win a year's membership of the Medical Library Association. See the conference website for more details.

As you prepare to join us, we encourage you to embrace the conference's spirit of unity, growth, and exploration. Both chapters have worked closely to offer some unique experiences that include time for networking, learning, previewing a movie, and purchasing opportunities galore, so get ready to immerse yourself in the wealth of knowledge and opportunities that await you.

Let's celebrate unity and growth amidst the lively backdrop of New Orleans, embracing both professional connections and the city's unique charm.

See you there!

Dede Rios
SCC/MLA President

Welcome, everyone, to the Joint Meeting of the Southern and South Central chapters of the Medical Library Association!

In November 1951, 34 health sciences librarians gathered in New Orleans to form the Southern [Regional] Chapter, elect officers, and hold the very first annual meeting. Ironically, Louisiana was represented at that first meeting but other southern states, that are now part of SC/MLA, were not. Much has changed since then, but now, 72 years later, we gather again in New Orleans.

This year's meeting theme is "kindred spirits" which conjures up feelings of togetherness and like-mindedness, which is appropriate considering we are embarking on a journey of discovery and camaraderie with one of our sister chapters. A larger meeting means more opportunities for learning, teaching, and fun! Speakers will present on topics ranging from cemeteries to a disease programs museum to health disparities. Be sure to attend all the meeting sessions and visit with vendors, but also remember to squeeze in a little time to make new "frolleagues" and explore The Big Easy!

Emily Brennan
SC/MLA Chair

SPEAKERS

Heather Veneziano

"Signaling Life: Decoding the Cities of the Dead"
Sunday, Sept. 24, 8:15 am

Heather Veneziano is an architectural historian and cultural heritage advisor with the preservation-consulting firm of Gambrel & Peak, as well as a Professor of Practice within the Historic Preservation program of Tulane School of Architecture.

Veneziano is also an award-winning author, an accomplished editor, and a contributor to several published works focused on cemetery studies and the architecture of the Gulf South. Her research and expertise are focused on cultural heritage sites, vernacular architecture and deathscapes, with a strong emphasis on historic preservation and placemaking.

She currently serves on the Executive Council of the Louisiana Historical Society, the Vieux Carré Commission, and is the co-chair of the Louisiana Chapter of the Association for Gravestone Studies.

Elizabeth Schexnyder

Thomas A. LaVeist

"Presentation Title TBA"

Monday, September 25, 3:00 pm

Sunday, September 24, 5:30 pm there will be a screening of Dr. LaVeist's documentary THE SKIN YOU'RE IN.

Dr. LaVeist's research and writing has focused on three broad thematic research questions: 1) What are the social and behavioral factors that predict the timing of various related health outcomes (e.g. access and utilization of health services, mortality, entrance into nursing home?); 2) What are the social and behavioral factors that explain race differences in health outcomes?; and 3) What has been the impact of social policy on the health and quality of life of African Americans? His work includes both qualitative and quantitative analysis. LaVeist seeks to develop an orienting framework in the development of policy and interventions to address race disparities in health-related outcomes. Specific areas of expertise include: U.S. health and social policy, the role of race in health research, social factors contributing to mortality, longevity and life expectancy, quantitative and demographic analysis and access, and utilization of health services.
